INTERAVIA

World Review of Aviation and Astronautics

Contents for Year 1962

GENERAL SUBJECTS

No. 1 **Transport Capacity: The Key to Mobility**
A New Formula for NATO?
Strategic and Tactical Military Air Transports

No. 2 **Safe Take-off, Flight, and Landing**
A New US Tilt-wing Transport
Accent on Rockets at Douglas

No. 3 **Missiles in the Nuclear Battle**
Air Transport in Africa
Photo-Reconnaissance

No. 4 **Short Haul with Profit?**
Automatic Landing
Germany's Aircraft Industry 1962

No. 5 **New Designs in Maritime Power**
Facing the Undersea Threat
Vectored Thrust for Vertical Take-off

No. 6 **Ground Effect Vehicles**
Hanover Air Show Report
Experimental Communications Satellites

No. 7 **Review of Private and Executive Aircraft**
The Swedish Air Defence Programme

No. 8 **Unpowered Flight**
VTOL Strike Aircraft with Composite Powerplants
Is There a Defence Against ICBMs?
New Techniques in Communications

No. 9 **The British Aircraft Industry**
IATA Airlines 1962
Putting a New Jet into Airline Service

No. 10 **Race for the Moon**
European Space Research
Farnborough in Close-up

No. 11 **Atomic Arsenals to Counter Nuclear War?**
Soviet Air Power
British Aviation Electronics Industry

No. 12 **The Future of Air Traffic Control**
Freight Aircraft Design

INDEX BY SUBJECTS

1. International Organisations

The Role of NATO — A. Buchan: 1/47
Why ASECNA? — M. Louis Sanmarco: 3/341
ASECNA in Africa: 3/342
The NATO Competition for a VTOL Single-seat Strike Aircraft: 5/592
Crisis within NATO: 8/965
IATA's 18th Annual General Meeting in Dublin — J. F. Dempsey: 9/1117
IATA Requirements for the Supersonic Airliner — S. Krzyczkowski: 9/1119
The 18th Annual General Meeting of IATA: 11/1403
Eurocontrol and Navigation: 12/1587

2. Defence and Political

NATO's Military Replanning: 1/29
The Value of Alliances: 1/47
The Role of NATO — A. Buchan: 1/47
Record US Armed Forces Budget: 2/149
Sweden's Defence Effort: 2/149
Britain Stresses Inter-Service Cooperation: 3/261
Time to Think: 3/279
The Dam: 4/411
The Ocean Arena: 5/561
Modern Maritime Warfare — E. Biörklund: 5/564
The Baltic Approaches: 5/568
The Royal Navy — Combined Operations Have Priority: 5/576
Lesson of Kuwait — Richard Brett-Smith: 5/578
Facing the Submarine Threat: 5/585
Uncertainty Dominant: 6/689
America's Mobile Medium Range Ballistic Missile: 7/816
Crisis within NATO: 8/965
The Future of Britain's Air Defence — D. Wood: 9/1097
A German Four-year Space Plan: 10/1259
Space and Politics: 10/1277
The Pentagon Ponders Space Strategy: 10/1296
The European Approach to Space: 10/1319
Living with the Nuclear Threat: 11/1421
The Balance of Nuclear Terror: 11/1422
The Wide Spectrum of Soviet Air Power: 11/1453
Soviet Warships as Missile Platforms: 11/1460
Is Tariff Revision the Remedy ?: 12/1545
Aviation and European Integration: 12/1563

3. Civil Aviation

The CAB Hits Out at Foreign Competition: 1/30
Integrating an Air-cargo System to Military/Commercial Operations: 1/85
The *Vertol 107* in Passenger Service: 1/93
Pace of Supersonic Airliner Development Quickens: 1/108
Green Light for Project Beacon — The Improvement of US Air Traffic Control: 1/109
The Safety of Air Traffic: 2/167
Aeroflot Chief Plans on 200 Million Passengers in 1980: 2/202
The French-speaking Countries of Africa: 3/338
The Dam: 4/411
European Air Transport in the 1960s: 4/412
Simplified Air Travel: 4/438
Uncertainty Dominant: 6/689
Air Union: Internationalization of Losses?: 7/833
General Aviation in America and Europe: 7/834
By Air into the Stone Age — Civil Aviation in New Guinea — J. Bühler: 7/872
IATA's 18th Annual General Meeting in Dublin — J. F. Dempsey: 9/1117
Aer Lingus — Eire's Stake in World Aviation: 9/1117
IATA Requirements for the Supersonic Airliner — S. Krzyczkowski: 9/1119
Supersonic Traffic — Ten Year Moratorium?: 9/1120
The Seven Mockups of the *727*: 9/1122
Cost Control, Fare Structure, and Traffic Increases: 9/1124
Pillars of World Air Transport: 9/1127
Introducing the *Coronado* on Swissair's Far Eastern Routes: 9/1149
By Air through New Zealand — H. Champion: 9/1174
The 18th Annual General Meeting of IATA: 11/1403
Aviation and European Integration: 12/1563
The Near East Looks to the Air — D. Wood: 12/1596

4. Service Aviation

The Balance of Forces Between East and West: 1/50

Western Military Air Transport: 1/52
Integrating an Air Cargo System to Military/Commercial Operations: 1/85
Record US Armed Forces Budget: 2/149
Sweden's Defence Effort: 2/149
Britain Stresses Inter-Service Cooperation: 3/261
Exercising the Transatlantic Airlift: 3/299
The Ocean Arena: 5/561
Modern Maritime Warfare — E. Biörklund: 5/564
The Royal Navy: 5/576
Lessons of Kuwait — Richard Brett-Smith: 5/578
Facing the Submarine Threat: 5/585
The NATO Competition for a VTOL Single-seat Strike Aircraft: 5/592
Sweden's Air Defence: 7/861
Crisis within NATO: 8/965
The Future of Britain's Air Defence — D. Wood: 9/1097
Extension of the Swedish Air Defence Control System: 10/1328
The Wide Spectrum of Soviet Air Power: 11/1453

5. Aircraft

a) Civil Aircraft

The Canadair *CL-44* in Operation: 1/74
Joint Military/Civil Planning — The Lockheed *C-141* Jet Freighter: 1/87
The *Vertol 107* in Passenger Service: 1/93
Pace of Supersonic Airliner Development Quickens: 1/108
Current Airworthiness Problems of Rotorcraft — H. E. le Sueur and J. Scanlon: 2/177
The Trident Flight Control System: 2/194
Heinkel *He 211*: Projected Short-haul Jet Airliner: 4/393
NAMCO *YS-11*: Japan's " National " Aircraft: 4/427
Design Considerations in the Boeing *727*: 4/428
The *Viscount's* Successor (BAC *One-Eleven*) — N. A. Barfield: 4/436
The Douglas *2086*, a " Compact Jet ": 5/551
For the Executive in a Hurry: *HFB-320*: 5/552
The Fokker *F.28*: 6/679
Lockheed Favours the Rigid Rotor Helicopter: 6/727
Beech Develops a Turboprop Tourer: 7/815
Some Single-engined Aircraft: 7/840
Series Production of the *Rallye*: 7/844
Alpine Flight to the Riviera (Beech *Queen Air 65*): 7/846
Technical Data on Some Modern Private Aircraft: 7/850
The *Jet Commander 1121* Executive Aircraft: 7/859
Trends in Sailplane Construction Today: 8/974
Technical Data for some Glider Types: 8/981
Picture Report on the *VC.10*: 9/1108
The de Havilland *DH.125*: 9/1111
IATA Requirements for the Supersonic Airliner — S. Krzyczkowski: 9/1119
Supersonic Traffic — Ten Years Moratorium?: 9/1120
The Seven Mockups of the *727*: 9/1122
Certification of the Lockheed *300/C-141A*: 9/1145
Introducing the *Coronado* on Swissair's Far Eastern Routes: 9/1149
New Soviet Civil Aircraft: 11/1468
The Multi-purpose Pilatus *Porter* — An Aerial Workhorse: 11/1494
The Versatile Cabin of the Douglas *DC-8F*: 12/1616
Air Freighters Promote Airfreight *(CL-44)*: 12/1619
Beech 120 — The Sales Campaign Has Begun: 12/1622

b) Military Aircraft

Western Military Air Transport: 1/52
The *Belfast* Military Transport: 1/63
The *Transall C-160*: 1/66
The Development of the Military *Argosy*: 1/71
The Canadair *CL-44* in Operation: 1/74
The *Caribou* — Flexible Logistical Capability for the US Army — J. E. Grimshaw: 1/76
Joint Military/Civil Planning — The Lockheed *C-141* Jet Freighter: 1/87
The *Super Frelon* — A Multi-purpose Helicopter for NATO: 1/90
A Standard VTOL Transport for the American Forces: 2/208
A Versatile Helicopter: The Hiller *Ten99*: 2/212
Operational Training for F-104 Pilots: The Fiat *G.91 T/4*: 2/225
The Macchi *MB.326C*: 2/226
The Boeing *C-135*: 3/300
Avro *748 MF* — British Short Range Military Transport: 4/495
The NATO Competition for a VTOL Single-seat Strike Aircraft: 5/592
The Hawker *P.1127*. V.T.O. — Vectored Thrust Operation: 5/596
Project Studies of V/STOL Strike Aircraft: 5/598
Two Wings in One — Variable Sweep for Series Production: 5/617
Fokker/Republic *D.XXIV Alliance*: VTOL Strike and Reconnaissance Aircraft with Variable Sweep Wings: 5/619
The Fiat *G.95/6* VTOL Strike Aircraft: 6/680
Lockheed Favours the Rigid Rotor Helicopter: 6/727
The *Chinook* Service Transport Helicopter: 7/866
The *Spirale III* — Ground Attack and Multipurpose Transport: 7/885
The *Mirage III Balzac*: 8/966
The *Balzac* in the Wind-Tunnel: 8/969
Lightning Test Flight — E. K. Barnes: 8/1013
Certification of the Lockheed *300/C-141A* Jet Freighter: 9/1145
The Ryan *VZ-11* Research Aircraft: 10/1347
The Wide Spectrum of Soviet Air Power: 11/1453
The Northrop *F-5*: A Versatile Fighter for Regional Warfare: 11/1462
From the *X-15* to the *X-20*: 12/1614

6. Guided Missiles and Rockets

Rockets, Missiles and Space Vehicles: 1/95, 2/211, 3/308, 5/625, 9/1204, 10/1325, 12/1598
The Missile and Space Systems Division of Douglas Aircraft Company: 2/197
Tactical Missiles in Nuclear Defence: 3/280
Blue Water: 3/284
Air Defence in the Nuclear Battle Zone: 3/286
France Builds Air-to-Air Rockets: 3/289
The *AS.30* Radio Guided Air-to-Ground Missile: 3/290
Missiles Versus Tanks: 3/292
ENTAC *T.581* Anti-tank Missile: 3/292
Polaris Submarines on Guard: 5/563
The Missile Submarine: Total or Partial Deterrent? — P. M. Gallois: 5/570
Naval Anti-aircraft Missiles: 5/574
ASROC Weapon System: 5/590
American's Mobile Medium Range Ballistic Missile: 7/816
Titan 1 Operational: 7/860
Current Limitations of Tracking Systems for Long-range Missiles — J. C. Simon: 8/999
Nike-Zeus: Suspended Sentence Before Trial: 8/1016
USAF Plant 78 — Production of large solid propellant motors: 10/1313
Guided Missiles at the Farnborough 1962 Show: 10/1341
The Effects of Nuclear Explosions: 11/1424
Underwater Nuclear Explosions: 11/1428
Nuclear Explosions — easier to ban than to detect: 11/1432
Ballistic Missiles and Military Strategy: 11/1434
Soviet Warships as Missile Platforms: 11/1460
Training *Pershing* Crews: 12/1611

7. Astronautics

Rockets, Missiles and Space Vehicles: 1/95, 2/211, 3/308, 5/625, 9/1204, 10/1325, 12/1598
The *Gemini* Project: 2/150
The Missile and Space Systems Division of Douglas Aircraft Company: 2/197
John Glenn's Spaceflight: 3/262
Orbiting Weather Reporters: 3/307
A Re-entry Guidance System for Space Vehicles: 4/460
" *Friendship 7* " in Orbit: 4/496
OSO: Orbiting Solar Observatory: 4/497
Situation Report on Communications Satellites: 6/749
Satellite Communications and Frequency Sharing: 6/753
Development of the *Relay* Communications Satellite: 6/758
Telstar: The Private Venture Satellite: 6/760
The *Advent* Stationary Communications Relay Satellite: 6/762
The British Space Development Company — E. Fennessy: 6/765
Space Fireworks: 6/769
Telstar Initiates the Atlantic TV Bridge: 8/956
Apollo: The Way to the Moon: 8/972
A German Four-year Space Plan: 10/1259
Space and Politics: 10/1277
Reaching for the Moon: NASA's Ten Year Programme: 10/1278
Rocket Engines for Spacecraft: *Saturn C-1* and *Titan 2*: 10/1289
The Lunar Landing Bug: 10/1291
Telstar reports...: 10/1294
The Pentagon Ponders Space Strategy: 10/1296
Space Age Catalogue (IV): 10/1298
Radionuclide Power — Something New Under the Sun — Dr. H. G. Morse: 10/1301
Progress in Solid Propellant Rocket Motors: 10/1304
The Rocketdyne *F-1* — 1.5 Million Pounds Thrust with a Single Engine: 10/1316
The European Approach to Space: 10/1319
The European Launcher: Progress and Problems — D. E. Kölle: 10/1322
" Routine " Spaceflight: 11/1386
From the *X-15* to the *X-20*: 12/1614

8. Powerplants

By-pass Engines Open New Markets to Jet Traffic: 4/430
Initial Development of the Rolls-Royce *Spey* By-pass Engine: 4/432
The Bristol Siddeley *BS.75* Turbofan: 4/433

The Development of the Bristol Siddeley Lift/Thrust Engine: 5/593
The Piston Engine is Very Much Alive: 7/848
The Piston Engine in General Aviation: 7/849
V/STOL Composite Powerplant and the *RB.162* — A. A. Lombard: 8/969
The Challenge of Miniaturizing Turbomachinery — Prof. W. T. von der Nuell: 8/1022
Linear Induction Motors — Dr. E. R. Laithwaite: 8/1029
Hypersonic Transport Powerplants — Dr. R. R. Jamison: 9/1205
Radionuclide Power — Something New Under the Sun — Dr. J. G. Morse: 10/1301
Progress in Solid Propellant Rocket Motors: 10/1304
USAF Plant 78 — Production of Large Solid Propellant Motors: 10/1313
The Rocketdyne *F-1* — 1.5 Million Pounds Thrust with a Single Engine: 10/1316
SBAC Show 1962 — Engines and Models: 10/1343

9. Electronics

Research and Production News: 1/100, 2/216, 3/324, 4/461, 5/628, 9/1197, 10/1327
Decca Radar Offers New Methods of Increasing Reliability: 1/105
Green Light for Project Beacon — The Improvement of US Air Traffic Control: 1/109
The *Trident* Flight Control System: 2/194
Electronic Aids for Air Traffic Control: 2/196
Electronics in the Service of Air Safety: 2/219
Collaboration in European Air Traffic Control: The HARCO Project: 2/222
The VICOM Air-Photo System: 3/302
An Integrated Photographic Reconnaissance System — J. S. Goldhammer: 3/304
Navigation at a Glance: 3/327
Loran Airborne Equipment by Edo — J. P. Callahan, H. P. Jennings: 3/329
The Principles of CW Radar: 3/333
European Radar Systems: 3/334
Automatic Landing: 4/451
The Main Projects and Proposals for Landing Aids and Automatic Landing: 4/452
Will ILS Lead to Automatic Landing?: 4/455
Airborne Systems for Reducing Landing Minima: 4/457
RAILS — a Blind Landing System for Helicopters: 4/458
A Re-entry Guidance System for Space Vehicles: 4/460
The German Equipment Industry: 4/487
Flight Training by Simulation — I. Parker: 5/630
Electronics in Hanover: 6/724
Situation Report on Communications Satellites: 6/749
Satellite Communication and Frequency Sharing — S. G. Lutz: 6/753
Development of the *Relay* Communications Satellite: 6/758
Telstar: The Private Venture Satellite: 6/760
The *Advent* Stationary Communications Relay Satellite: 6/762
The VORDAC Project: 6/766
Electronic Equipment for the Smaller Aircraft: 7/888
VHF Communications and Navigation Equipment for Private and Business Aircraft: 7/889
The Use of Circular Polarisation in Radar — Jacques Raverdy: 7/892
Automation in Air Traffic Control — An Evolutionary Concept — H. D. Mitchell: 7/894
Telstar Initiates the Atlantic TV Bridge: 8/956
Trends and Advances in Communications Techniques: 8/989
Cesium Clouds Reflect Radio Waves: 8/992
Laser: Light Amplification from the Ruby Crystal: 8/997
Current Limitations of Tracking Systems for Long-range Missiles — J. C. Simon: 8/999
Radio Navigation Equipment for Hovercraft — J. H. Beattie: 8/1031
The Electronics Industry: 9/1103
LFE Doppler Instrumentation: 9/1199
Helicopter Flight Control — J. A. Simpson: 9/1201
The 9th International Electronics and Nucleonics Exhibition: 9/1203
Extension of the Swedish Air Defence Control System: 10/1328
The British Electronics Industry — Farnborough Report: 11/1477
Lightweight Automatic Flight Control Systems: 11/1486
The AN/ASN-24(V) Navigation Computer for the *C-141* Jet Transport — Dr. D. L. Farr: 11/1488
The Future of Air Traffic Control: 12/1564
Automation — a Solution to the Air Traffic Control Problem? — J. D. Blatt: 12/1565
Official ATC Projects in Europe: 12/1569
Automation in Air Traffic Control — W. R. R. Haines: 12/1576
Eurocontrol and Navigation: 12/1587
Official Comments on Navigational Aids: 12/1591
Thoughts on Radio Navigation Systems — K. E. Karwath: 12/1592
Navigation Requirements for Effective Air Traffic Control — C. F. Blair: 12/1593

10. Non-electronic Equipment

Procedure for Ascertaining QNH — E. Rössger and G. Ränike: 1/110
Accidents and Instruments: 2/179
Ejection Seat Development — G. P. Green: 2/191
Equipment — Materials — Techniques: 2/214, 3/310, 4/498, 5/626, 7/896, 9/1173, 11/1484, 12/1624
The VICOM Air-Photo System: 3/302
An Integrated Photographic Reconnaissance System: 3/304
The German Equipment Industry: 4/487
Around the Equipment Exhibition (Hanover): 6/726
Evolution or Revolution in Undercarriages — J. Leclerq: 7/868

11. Airports and Airport Equipment

New Runway Arrester Gear for USAF Bases: 3/323
The Befab *Safeland* Barrier: 7/871
TWA Builds for the Future: 9/1121

12. Research and Technical

Procedure for Ascertaining QNH — E. Rössger and G. Ränike: 1/110
The Safety of Air Traffic: 2/167
Built-in Safety — The Aircraft Constructor's Contribution: 2/171
Crashworthiness of a Modern Airliner — M. de Bayser: 2/174
Current Airworthiness Problems of Rotorcraft: 2/177
Accidents and Instruments: 2/179
The NATO Competition for a VTOL Single-seat Strike Aircraft: 5/592
The Development of the Bristol Sidddley Lift/Thrust Engine: 5/593
The Hawker *P.1127*. V.T.O. — Vectored Thrust Operation: 5/596
Project Studies of V/STOL Strike Aircraft: 5/598
Two Wings in One — Variable Sweep for Series Production: 5/617
Will Ground Effect Machines Fulfil Expectations?: 6/690
Britain Develops Ground Effect Machines: 6/695
Lockheed Favours the Rigid Rotor Helicopter: 6/727
Evolution or Revolution in Undercarriages — J. Leclerq: 7/868
The *Mirage III Balzac*: 8/966
The *Balzac* in the Wind-Tunnel: 8/969
Lightning Test Flight — E. K. Barnes: 8/1013
Linear Induction Motors — Dr. E. R. Laithwaite: 8/1029
Hypersonic Transport Powerplants — Dr. R. R. Jamison: 9/1205
The Ryan *VZ-11* Research Aircraft: 10/1347
The Principles and Tasks of Radio Astronomy — H. H. Klinger: 11/1491
From the *X-15* to the *X-20*: 12/1614

13. Industry

Built-in Safety — The Aircraft Constructor's Contribution: 2/171
France Builds Air-to-Air Rockets: 3/289
Design Considerations in the Boeing *727*: 4/428
The *Viscount*'s Successor — N. A. Barfield: 4/436
The German Aircraft Industry: 4/479
The German Equipment Industry: 4/487
Uncertainty Dominant: 6/689
The British Space Development Company — E. Fennessy: 6/765
Beech, Cessna, Piper: "The Big Three": 7/842
Series Production of the "*Rallye*" — F. Carayon: 7/844
The U.S.I.Aé.S. Spring Tour: 8/1002
The French Aviation Industry Plans Ahead: 9/1080
British Aircraft Industry 1962: 9/1098
The British Electronics Industry: 9/1103
USAF Plant 78 — Production of Large Solid Propellant Motors: 10/1313
The Last Annual Farnborough: New Prospects for the British Industry: 10/1337
European Reaction to Farnborough: 11/1404
The Belgian Aircraft Constructors: 11/1497
Aviation and European Integration: 12/1563

14. Exhibitions and Congresses

Hanover Air Show: 6/717
Electronics in Hanover: 6/724
Around the Equipment Exhibition (Hanover): 6/726
IATA's 18th Annual General Meeting in Dublin — J. F. Dempsey: 9/1117
The 9th International Electronics and Nucleonics Exhibition: 9/1203
The Last Annual Farnborough: New Prospects for the British Industry: 10/1337
The 18th Annual General Meeting of IATA: 11/1403
European Reaction to Farnborough: 11/1404
The British Electronics Industry — Farnborough Report: 11/1477
Some New British Products: 11/1484

15. Miscellaneous

Interavia Air Letter Reports: 1/11, 2/139, 3/243, 4/375, 5/533, 6/661, 7/805, 8/937, 955; 9/1061, 1079; 10/1341, 11/1385, 12/1527

What's in the Air?: 1/96, 2/204, 3/312, 4/492, 5/621, 6/730, 7/898, 8/1026, 9/1178, 10/1350, 11/1465, 12/1600
The Soviet Navy: 5/573
Facing the Submarine Threat: 5/585
Will Ground Effect Machines Fulfil Expectations?: 6/690
Hovercar: Aircraft Speeds at Railway Prices: 6/693
Britain Develops Ground Effect Machines: 6/695
American Ground Effect Vehicles: 6/699
Variety in Ground Effect Vehicles: 6/702
Crossing the Channel by Hovercraft: 6/703
General Aviation in America and Europe: 7/834
Causes of Clear Air Turbulence — W. Partl: 7/874
Metric System for the UK?: 8/956
Progress with the Westland *SR.N2* Hovercraft: 12/1627
The Effects of Decompression on Board Transport Aircraft — J. Lavernhe, E. Lafontaine: 12/1628

16. Index of Tables

Technical Data of Military Transport Aircraft: 1/55
European Radar System: 3/334
Leading Particulars of Short and Medium Haul Airliners (Turbojets): 4/415
Leading Particulars of Short and Medium Haul Airliners (Turboprops): 4/418
Leading Particulars of By-pass Engines for Short-haul Aircraft: 4/431
The Main Projects and Proposals for Landing Aids and Automatic Landing: 4/452
The Principal Members of the Equipment, Accessory, and Supply Industries Situated in Western Germany: 4/487
Aircraft Carriers of Recent Design: 5/565
The Principal Ship-based AA Missiles: 5/575
Communications Satellites already Launched or under Development: 6/750
Proposals for Communications Satellites: 6/751
Piston Engines for Sports and Touring Aircraft: 7/849
Technical Data on Some Modern Private Aircraft: 7/850
VHF Communications and Navigation Equipment for Private and Business Aircraft: 7/889
Technical Data for some Glider Types: 8/981
Pillars of World Air Transport: 9/1127
Space Age Catalogue (IV): 10/1299
The Balance of Nuclear Terror: 11/1422

Champion, H. — By Air through New Zealand: 9/1174
Cooper-Jones, D. L. — Will ILS Lead to Automatic Landing?: 4/455
Crampton, M. J. — V.T.O. — Vectored Thrust Operation: 5/596

Dempsey, J. F. — IATA's 18th Annual General Meeting in Dublin: 9/1117
Dennis, J. N. — Radio Navigation Equipment for Hovercraft: 8/1031

Farr, Dr. D. L. — The AN/ASN-24(V) Navigation Computer for the *C-141* Jet Transport: 11/1488
Fennessy, E. — The British Space Development Company: 6/765

Gallois, M. P. — The Missile Submarine: Total or Partial Deterrent?: 5/570
Goldhammer, J. S. — An Integrated Photographic Reconnaissance System: 3/304
Green, G. P. — Ejection Seat Development: 2/191
Grimshaw, J. E. — The *Caribou*: Flexible Logistical Capability for the US Army: 1/76

Haines, W. R. R. — Automation in Air Traffic Control: 12/1576
Hare, M. E. A. — Initial Development of the Rolls-Royce *Spey* By-pass Engine: 4/432
Honick, K. R. — Navigation at a Glance: 3/327

Israël, J. — Accidents and Instruments: 2/179

Jamison, Dr. R. R. — Hypersonic Transport Powerplants: 9/1205
Jennings, H. P. — *Loran* Airborne Equipment by Edo: 3/329

Karwath, K. E. — Thoughts on Radio Navigation Systems: 12/1592
Kirtleside, Lord Douglas of — European Air Transport in the 1960s: 4/412
Klinger, H. H. — The Principles and Tasks of Radio Astronomy: 11/1491
Kölle, D. E. — The European Launcher: Progress and Problems: 10/1322
Kramar, Dr. E. — The VORDAC Project: 6/766
Krzyczkowski, S. — IATA Requirements for the Supersonic Airliner: 9/1119

Lafontaine, E. — The Effects of Decompression on board Transport Aircraft: 12/1628
Laithwaite, Dr. E. R. — Linear Induction Motors: 8/1029
Lavernhe, J. — The Effects of Decompression on board Transport Aircraft: 12/1628
Leclerq, J. — Evolution or Revolution in Undercarriages: 7/868
Lombard, A. A. — V/STOL Composite Powerplant and the *RB.162*: 8/969
Lutz, Dr. S. G. — Satellite Communication and Frequency Sharing: 6/753

Macaigne, J. — ASECNA in Africa: 3/342
MacMahon, F. K. — The *Chinook* Service Transport Helicopter: 7/866
Mitchell, H. D. — Automation in Air Traffic Control — An Evolutionary Concept: 7/894
Morse, Dr. H. G. — Radionuclide Power — Something New under the Sun: 10/1301

Nuell, Prof. W. T. von der — The Challenge of Miniaturising Turbomachinery: 8/1022

Parker, Ira — Flight Training by Simulation: 5/630
Partl, W. — Causes of Clear Air Turbulence: 7/874

Ränike, G. — Procedure for Ascertaining QNH: 1/110
Raverdy, J. — The Use of Circular Polarisation in Radar: 7/892
Rössger, Prof. E. — Procedure for Ascertaining QNH: 1/110

Sanmarco, M. L. — Why ASECNA?: 3/341
Scanlon, J. — Current Airworthiness Problems of Hovercraft: 2/177
Simon, J. C. — Current Limitations of Tracking Systems for Long-range Missiles: 8/999
Simpson, J. A. — Helicopter Flight Control: 9/1201
Steiner, J. E. — Design Considerations in the Boeing *727* 4/428
Sueur, Le H. E. — Current Airworthiness Problems of Hovercraft: 2/177

Turner, R. L. — Simplified Air Travel: 4/438

Wood, D. — The Future of British Air Defence: 9/1097; The Near East Looks to the Air: 12/1596

Publisher: Interavia, Geneva 11, Switzerland
